## Website Developer

### Profile

Motivated and detail-oriented Web Developer with hands-on experience in building responsive, user-friendly websites using HTML, CSS, JavaScript, and modern frameworks like Tailwind CSS and React. Passionate about creating clean, efficient code and continuously learning new technologies to deliver high-quality web solutions. Strong foundation in front-end development and actively expanding skills in full-stack and blockchain development.

### My Journey

I began my web development journey with a strong curiosity for how websites work and quickly developed a passion for building clean, functional user interfaces. Starting with HTML, CSS, and JavaScript, I've grown to explore modern tools like Tailwind CSS and React. Along the way, I've worked on real-world projects, followed expert-led tutorials, and continuously challenged myself to improve. I'm now expanding into full-stack and blockchain development to stay ahead in the tech space and bring more value to the digital world.
